## Mobile Office Communication Assistant

**MOCA - 800 / 1000**      *Mobile Your Office*

Mobile Office Communication Assistant (MOCA) extends your office into Ubiquitous office! Now your cell phones, traditional phones and IP phones become your office extensions and can be located anywhere in the world; Calling each other is FREE just like co-located in one building. In addition, low-rate "Internet call" (VoIP) is the standard feature of MOCA.

MOCA is specifically designed for SOHO and SMB users. It combines traditional PABX and state-of-art IP PBX features so PSTN, GSM, WiFi, 3G / 3.5G, and ITSP will be interworking together, which makes free calls and low-rate International/long distance calls possible. "Web-Call" is also provided for your customers and potential customers to call you free while reading your web pages.

MOCA offers most traditional PABX and IP PBX functions. You can use key phone since it has rich and familiar features; you can use IP phones / soft phones remotely as long as there is Internet connection; you can also use WiFi phone / 3G / 3.5G cell phones as extensions because of MOCA's unique capability. Besides cutting phone bill down, with MOCA, can you imagine any more missed calls?
