

# SKYPBX SERIES

## Skype IP-PBX Server for SOHO/SMB

### Introduction:

The skyPBX (Skype IP PBX Server) is the next generation IP PBX system with skype function for small and medium business applications. It is designed to operate on a variety of VOIP applications, such as auto-attendant, conference, call transfer, call pick up and IP-based communications. With the skyPBX, small to medium enterprises are capable of making VOIP and Skype calls. IP Phones, Voice Gateway or IP PBX can be used to interoperate with the skyPBX and provide PSTN connections and extensions. The skyPBX allows users to dial out by SkypeOut and to receive Skype calls (SkypeIn) using the existing PBX phones.
